A Dietary Supplement to Support Proper Joint and Connective Tissue Functions*

Did You Know...

Your joints are held together by a variety of connective tissues and support materials. Most structural joint support formulas focus on glucosamine, chondroitin and/or MSM. While in theory this is logical, the body has a very limited window to make use of nutrients like chondroitin.

HealthSource Joint Health is different.* Perna canaliculus, the primary active ingredient in HealthSource Joint Health, is an edible species of shellfish from New Zealand. The natural-ly-occurring components in Perna support joint lubrication and flexibility, help reduce joint discomfort and help improve range of motion.*

The HealthSource Difference

HealthSource Joint Health is an advanced joint and connective tissue formula that can be used as an alternative or in conjunction with other joint health programs.* It combines the powerful benefits of Perna (a green-lipped muscle extract), Glucosamine, Methylsulfonylmethane (MSM), Dimethylglycine (DMG) and Manganese for a quicker response than would be seen if any nutrient was taken singularly.*

FEATURES

- Contains extract of Perna canaliculus
- Has a unique, synergistic formula including glucosamine, chondroitin, MSM and hyaluronic acid
- Contains DMG, a patented versatile metabolic enhancer*

BENEFITS

- Supports structural and connective tissues of the joint*
- Superior bioavailability versus leading competitors*
- Improved nutrient delivery *
