

Pro-Bio Source

A Uniquely Advanced Probiotic for Patients Needing Comprehensive Gut and Systemic Support.

Did You Know...

Your gut does more than just digest food, it protects your immune system, balances inflammation, and even influences your mood. Pro-Bio Source is a professional-grade probiotic designed to restore and strengthen your gut health with clinically studied strains like Akkermansia muciniphila, Lactobacillus plantarum, and Lactobacillus acidophilus. If you are dealing with bloating, fatigue, inflammation, or frequent illness, your gut may be calling for help.

The HealthSource Difference

Unlike other probiotics on the market, Pro-Bio Source features Akkermansia muciniphila, a next generation strain known for creating an ideal environment for a healthy gut. Other probiotics attempt to repopulate the good bacteria, but they are almost instantly killed off because the gut environment is substandard.

Akkermansia Muciniphila

- Supports gut lining to help reduce leaky gut and improve digestion.*
- Helps lower inflammation for better immune balance and energy.*
- Aids metabolism to support blood sugar, insulin, and weight control.*

Lactobacillus Plantarum

- Eases digestion by supporting a healthy gut lining and reducing bloating or discomfort.*
- Supports immune health by helping your body respond better to everyday threats.*
- Helps fight bad bacteria to keep your gut balanced and feeling it's best.*

Lactobacillus Acidophilus

- Helps relieve lactose intolerance by aiding in the breakdown of dairy products.*
- Supports vaginal and urinary tract health by maintaining healthy microbe levels in the urogenital tract.*
- Assists in recovery after antibiotics by replenishing good bacteria lost during treatment.*
